PIPER 520 Stool

design RODOLFO DORDONI

DESCRIPTION

Stool for outdoor use.

STRUCTURE

Aluminium frame treated with electrostatic powder painting with polyester base that gives more protection from scratches and also the final colouring to the product.

It can be recycled 100% and infinite times without losing its original features.

SEAT

TEAK: Teak wood contains a natural oily resin which makes it extremely resistant to weather, temperature, parasite attacks and insects. The exposure outdoor creates a 1/2 mm-thick oxidation patina on the wood surface which favors its discoloration to a silver-grey color; this change does not affect its original characteristics in any way. The grey patina can be avoided or removed with the correct maintenance.

CUSHION

Hydro draining
