

Wooden side tables available in different dimensions.

Base: elm heartwood Abonos™.

Top: elm heartwood Abonos™.

Notes:

Abonos™ is a wood of fluvial origin characterized by a thousand-year permanence in the water, where it was transformed through the action of sediments such as gravel, sand and clay. The series of chemical mutations, to which it has been subjected by nature has made each trunk a unique piece, in colour and design, without this affecting its structural qualities of hardness and resistance.

The elm heartwood Abonos™ is treated to be water and oil-repellent with a water-based finish that limits the absorption of liquids and greasy substances.

This product can be used also in interior environments.

We advise to use a Winter Set protection cover.
