

Aspic 001 Side Table

Design Gordon Guillaumier

Technical Information

Poured concrete takes shape and breathes life into the new versatile ASPIC tables by Gordon Guillaumier. One of RODA's latest products, the ASPIC line stands out for its solid concrete structure, sinuous lines and finish with visible grittiness on the surface. The three new tables - two with round tops in different sizes and a larger oval version - are extremely versatile; the cement structure gives a sense of stability and durability which contrasts with the visual delicacy of the top and the concave lines of the base. With no legs or feet but sleek vertical walls to support the top, ASPIC tables can be juxtaposed at different heights to arrange spaces in complete freedom; they also complement seating and poufs.

TECHNICAL INFORMATION

DESCRIPTION

Side table for outdoor use.

STRUCTURE

Concrete

WEIGHT

Structure 35kg

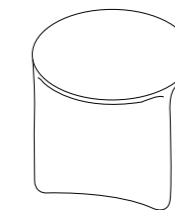

STORAGE COVER

Available.

DIMENSION

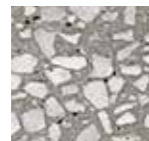

Ø 46 x H 18 cm

Ø 18" $\frac{1}{8}$ x H 17" $\frac{3}{4}$

Materials

CONCRETE

Grey
