

Ground platform.

The Shibui series also includes an armchair, a chaise longue and a suspended platform.

The natural materials featured in the Eres collection can be used outdoors, but not be directly exposed to the elements, and require some extra attention and care than traditional outdoor furniture. These products need to be used under a stable cover and to be protected overnight. It is also recommended that they are sheltered indoors for seasonal protection. Some of the materials will mature and will change appearance and colour over time. And this will naturally happen.

Structure: avorio varnished stainless steel AISI 304 provided with steel feet and plastic spacers.

Seat panel: bamboo sticks tied with jute straps and fixed to the structure.

Seat pad:

independent and with removable cover, available in two versions

- natural latex, paineira vegetable fiber and woolen felt, fixed covering in 100% cotton fabric
- polyester fiber with insert in stress resistant expanded polyurethane and fixed foam covering in waterproofed polyester.

Seat pad upholstery:

- Lino Grezzo
- Lino Délavé
- Canapa Délavé

Shibui

design : F. Rota

As an alternative to the seat pad, it is possible to use Trapuntino, a thin quilt padded with paineira vegetable fiber and fixed upholstery in linen or hemp fabric.

Notes:

The entirely natural padding of both the seat pad and the Trapuntino quilt guarantees the same comfort of a traditional synthetic padding.

The paineira vegetable fiber is water repellent, non-allergenic and completely biodegradable.

The structures and the sticks in bamboo mature over time, changing in colour, compactness and texture, without this affecting their quality.

The product can be used also in interior environments.

We advise to use a Winter Set protection cover.
